PROFESSIONAL SUMMARY

Software Engineer with **1+ year of hands-on experience** in **Backend Development** and **Full Stack Web Development**, specializing in **Python, FastAPI, Django, React.js, REST API Development, and SQL databases**. Experienced in designing scalable web applications, developing secure backend services, building responsive user interfaces, and integrating RESTful APIs. Proven track record at **DRDO – Integrated Test Range (ITR)** of achieving **99.8% system uptime**, reducing deployment defects by **25%**, and improving application performance by **35%** through optimization and automated testing. Strong knowledge of **Object-Oriented Programming (OOP), SQLAlchemy ORM, Authentication & Authorization, CRUD Operations, Database Optimization, MVC Architecture, Software Development Life Cycle (SDLC), Agile Methodology, Version Control (Git/GitHub), and API Integration**. Passionate about building reliable, scalable, and high-performance software solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python (Advanced), JavaScript (ES6+), TypeScript, SQL, PHP, HTML5, CSS3
- **Backend Development:** FastAPI, Django, Django REST Framework (DRF), Flask, RESTful API Development, API Integration, SQLAlchemy ORM, Django ORM, Pydantic, Uvicorn, JWT Authentication, Authentication & Authorization, CRUD Operations, JSON Processing, File Upload Management
- **Frontend Development:** React.js, React Hooks, Vite, JavaScript, Axios, HTML5, CSS3, Bootstrap, Responsive UI Design
- **Databases:** PostgreSQL, MySQL, MariaDB, SQLite, Supabase, Database Design, Database Management, Schema Design, Query Optimization, Joins, Aggregations, Indexing
- **Cloud, APIs & Integrations:** Supabase, Cloudinary Integration, Brevo Email API, SMTP Email Integration, REST APIs, Webhooks (Basic), Environment Variables (.env)
- **Deployment & DevOps:** Vercel, Render, Railway (Basic), Linux, Git, GitHub, Virtual Environments (venv), Basic CI/CD Concepts
- **Testing & Debugging:** Selenium, PyTest, Cross-Browser Testing, API Testing (Postman), Debugging, HTML Test Reports
- **Developer Tools:** Git, GitHub, Postman, VS Code, PyCharm, MySQL Workbench, pgAdmin, phpMyAdmin
- **Software Engineering:** Object-Oriented Programming (OOP), MVC Architecture, Software Development Life Cycle (SDLC), Agile Methodology, Version Control, Database Optimization, Technical Documentation, Problem Solving

PROFESSIONAL EXPERIENCE

Software Engineer Apprentice

Jan 2025 – Jan 2026

Integrated Test Range (ITR), DRDO — Chandipur, Odisha, India | Contract No.: CORBACGE24011993125

- Engineered and maintained Python-based backend services for mission-critical enterprise software, achieving **99.8% system uptime**.
- Developed and maintained **RESTful APIs** and backend modules following **MVC architecture** and software engineering best practices.
- Automated software testing using **Python, Selenium, and PyTest**, reducing manual testing effort by **40%** and deployment defects by **25%**.
- Profiled application performance, optimized database queries, and improved execution speed by **35%** through code and **database optimization**.
- Participated in the complete **Software Development Life Cycle (SDLC)**, including requirement analysis, design, implementation, testing, deployment, documentation, and maintenance.
- Used **Git** for version control, participated in peer code reviews, and collaborated in an **Agile** development environment.

Full Stack Development Training Program

2024

JSpiders – Technology Training Institute, Bangalore, India

- Completed an intensive project-based training program in Python, Django, SQL, JavaScript, and REST API Development.
- Built multiple full-stack applications using **Object-Oriented Programming, Database Design, API Integration**, and software engineering best practices.

KEY PROJECTS

- Cinema Seat Reservation System** — *Python, Django REST Framework, React.js, TypeScript, PostgreSQL*
- Architected RESTful backend endpoints with Django REST Framework to handle real-time booking transactions, seat-tier pricing logic, and data persistence in PostgreSQL.
 - Designed a normalized PostgreSQL schema for users, bookings, and pricing tiers, optimizing query performance for concurrent transactions.
 - Built a component-driven React.js/TypeScript frontend with real-time state management and responsive rendering.
- Donation Management System** — *Python, FastAPI, React.js, MySQL, REST APIs, JWT Authentication, SMTP Email Integration, Vercel, CRUD Operations*
- A scalable, full-stack web application for secure online donation management, enabling efficient transaction processing, administrative verification, and automated donor communication.
 - Secure donation submission with payment screenshot and transaction ID validation.
 - Role-based administrative dashboard for donation approval and status management.
 - Automated email notifications following successful donation verification.
 - Optimized REST API architecture with SQLAlchemy for efficient database interactions.
 - Responsive React.js interface delivering a seamless user experience across devices.
- AWS Agreement RAG Chatbot** — *Python, FastAPI, Streamlit, LangChain, SQL*
- Developed an AI-powered RAG chatbot for natural-language querying of AWS agreement documents, with a FastAPI backend for document processing, embeddings, and retrieval-based QA.
 - Integrated LangChain and vector search to deliver accurate, context-aware responses.
- Digital Attendance Tracker** — *Python, Django, React.js, TypeScript, PostgreSQL, MySQL*
- Developed a full-stack web portal with role-based access control for administrators and employees using Django and React.js/TypeScript.
 - Implemented secure authentication and a normalized PostgreSQL/MySQL schema, reducing manual attendance errors and streamlining HR operations.
- AI-Powered Personal Assistant (JARVIS)** — *Python, SpeechRecognition, NLP*
- Built a voice-activated personal assistant using Python NLP libraries to parse and execute system commands, improving command recognition accuracy by 20% through robust error handling.

EDUCATION

B.Tech in Computer Science and Engineering	2017 – 2021
<i>Radhakrishna Institute of Technology and Engineering, Bhubaneswar, Odisha CGPA: 7.94 / 10 (74.37%)</i>	
Higher Secondary (+2), Science	2014 – 2017
<i>Stewart Science College, Cuttack, Odisha Percentage: 52%</i>	
Matriculation	2013 – 2014
<i>S.S.V.M Tulasipur, Cuttack, Odisha Percentage: 57%</i>	

CERTIFICATIONS & TRAINING

- Data Analysis Using Python – IBM
- Python (Basic) – HackerRank (Certificate ID: 0e618ad01c64)
- SQL (Basic) – HackerRank (Certificate ID: f2d8e83dae15)
- Python with Django – Central Tool Room and Training Centre (CTTC), Bhubaneswar

ADDITIONAL INFORMATION

- Available for immediate joining.
- Open to remote, hybrid, and on-site opportunities.
- Strong problem-solving ability, attention to detail, and communication skills.

LANGUAGES

English (Professional Proficiency), Hindi (Fluent), Odia (Native)
