PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience developing scalable backend services and full-stack web applications using Python, FastAPI, Django, React.js, TypeScript, PostgreSQL, and REST APIs. Experienced in API-first architecture, SQLAlchemy, Pydantic, JWT Authentication, Microservices, database optimization, Agile/Scrum, and AI-ready backend engineering. Known for building scalable, secure, and intelligent automation solutions that enhance productivity and reduce manual effort. Passionate about leveraging Microsoft and AI-driven technologies to drive innovation and business transformation.

CORE COMPETENCIES

• Python Software Development • Backend Development • Full-Stack Web Development • FastAPI Development • Django Development • Django REST Framework • RESTful API Development • API Design & Integration • React.js Development • TypeScript & JavaScript • AI/ML-Ready Application Development • Data Processing & Automation • Data Pipelines • Database Design & Optimization • PostgreSQL & MySQL • SQL Query Optimization • Authentication & Authorization • JWT & Role-Based Access Control • Automated & API Testing • Debugging & Troubleshooting • Performance Optimization • Agile/Scrum • SDLC • Git/GitHub & Code Review

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Backend:** FastAPI, Django, Django REST Framework, Flask, SQLAlchemy, Pydantic, REST APIs
- **Frontend:** React.js, React Hooks, Vite, Axios, Bootstrap, Responsive UI
- **Databases:** PostgreSQL, MySQL, MariaDB, SQLite, Supabase, Query Optimization
- **Testing:** pytest, Selenium, Postman, API Testing
- **AI Platforms:** OpenAI, Google Gemini, Microsoft Copilot, Prompt Engineering, AI-Assisted development, GCP
- **Cloud & DevOps:** Git, GitHub, Vercel, Render, Railway, CI/CD
- **Methodologies:** Agile, Scrum, SDLC, OOP, MVC, Code Review, Technical Documentation
- **Tools:** Power BI, Docker, Doccano, PyCharm, VS Code, Jupyter, AWS SageMaker
- **OS & Scripting:** Linux (Shell scripting), Windows

PROFESSIONAL EXPERIENCE

Software Engineer | HCLTech, India

January 2022 – Present

- Develop enterprise web applications using Python, FastAPI, Django, React.js, and TypeScript.
- Design scalable RESTful APIs with Pydantic validation and JSON-based architecture.
- Build reusable React components integrated with Python backend services through REST APIs and Axios.
- Implement application business logic, CRUD operations, validation, exception handling, API integrations, and data-processing workflows.
- Implement JWT Authentication and Role-Based Access Control (RBAC).
- Design and maintain relational database schemas using PostgreSQL and MySQL.
- Implement database persistence and ORM-based data access using SQLAlchemy and Django ORM.
- Optimize SQL queries, joins, indexing, filtering, and database performance.
- Perform API testing with Postman and automated testing using pytest and Selenium.
- Collaborate in Agile/Scrum teams using Git and GitHub for version control, branching, pull requests, and code reviews.

SELECTED PROJECTS

Enterprise Customer Service & Case Management Platform

Domain: Banking & Financial Services | Role: Software Engineer |

Tech: Python, FastAPI, React.js, TypeScript, PostgreSQL, SQLAlchemy, REST APIs, JWT, Axios, Git

- Developed FastAPI microservices, ML-ready REST APIs with Pydantic, secure authentication, and optimized PostgreSQL data models.
- Developed responsive React.js and TypeScript interfaces for business users and administrators, integrated with FastAPI services via Axios.
- Implemented JWT-based authentication and role-based access control.
- Designed PostgreSQL schemas for customers, cases, users, service requests, and workflow transactions using SQLAlchemy ORM for optimized queries

Retail Order Management & Customer Analytics Platform

Domain: Retail & E-Commerce | Role: Software Engineer |

Tech: Python, Django, Django REST Framework, React.js, JavaScript, PostgreSQL, MySQL, REST APIs, Axios, Bootstrap, Git

- Developed backend modules using Python and Django for customers, products, orders, inventory, and transactions, exposed via Django REST Framework APIs.
- Built responsive React.js interfaces for product management, order processing, customer management, and analytics/reporting, using reusable components and React Hooks.
- Designed relational database structures using PostgreSQL and MySQL; optimized queries, joins, filtering, and indexing.
- Implemented CRUD operations, business validation, and role-based access for application users.
- Performed API testing using Postman and automated test cases; investigated defects and delivered enhancements.

Digital Attendance & Workforce Management Portal

Domain: Enterprise HR / Workforce Management | Role: Software Engineer |

Tech: Python, Django, React.js, TypeScript, PostgreSQL, MySQL, REST APIs, JWT, Git

- Developed Python/Django backend modules and RESTful APIs for attendance, employee records, authentication, and reporting.
- Implemented role-based access control, secure authentication, and normalized PostgreSQL/MySQL database schemas for employee and attendance data.
- Developed reporting and data-filtering functionality, optimized database queries and backend logic, and performed API testing using Postman.

EDUCATION

B.Tech – Computer Science & Engineering (AI Honours)

2017 – 2021

Radhakrishna Institute of Technology & Engineering, Bhubaneswar, Odisha | **CGPA: 7.94/10**

Higher Secondary (Science)

2014 – 2017

Stewart Science College, Cuttack | **52%**

Matriculation

2013 – 2014

S.S.V.M. Tulasipur, Cuttack | **57%**

CERTIFICATIONS

- Data Analysis Using Python – IBM
- Python Django & REST API – DurgaSoft
- SQL (Basic) – HackerRank
- Python with Django – CTTC Bhubaneswar

LANGUAGES

- English (Professional)
- Hindi (Fluent)
- Odia (Native)
