

DEBIDUTTA BEHERA

Full Stack Engineer | Remote / Hybrid / On-site
Cuttack, Odisha, India | +91-7978213833 | debidutta.db@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with hands-on experience building scalable backend services, FastAPI, RESTful APIs, and responsive frontend interfaces. Proficient in Python (Advanced), Django REST Framework, HTML, CSS, JavaScript, TypeScript fundamentals, React.js, PostgreSQL, MongoDB, and automated UI testing with Selenium and PyTest. Proven track record at DRDO's Integrated Test Range achieving 99.8% system uptime. Demonstrates strong ownership over the full feature development lifecycle — from requirement analysis through deployment — with a seeker mindset that actively pursues innovative, optimized solutions.

TECHNICAL SKILLS

Backend & Python: Python (3.x) (Advanced), Flask, RESTful API Design, FastAPI

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML, CSS, Responsive Design, UI/UX

Databases: PostgreSQL, MongoDB, MySQL, SQLite — schema design, joins, aggregations, indexing

Cloud & DevOps: GCP (Familiarity), Git, Postman, VS Code, CI/CD Principles

Automation & Testing: Python Selenium, PyTest, Cross-Browser UI Testing, HTML Test Reports

Design Tools: Figma, Blender

Languages: Python, TypeScript, JavaScript, SQL, PHP, C++

PROFESSIONAL EXPERIENCE

Apprentice Trainee — Python Developer & Automation Engineer |

Integrated Test Range (ITR), DRDO

Jan 2025 – Jan 2026

Chandipur, India | **Contract No.: CORBACGE24011993125**

- Built and maintained Python-based backend services for mission-critical enterprise applications, achieving 99.8% system uptime through robust service design and ownership of the full feature lifecycle.
- Automated UI testing protocols using Python Selenium and PyTest, reducing manual testing effort by 40% and deployment errors by 25% — demonstrating deep ownership of quality assurance.
- Optimized frontend/backend Python scripts to eliminate runtime bottlenecks, delivering a 35% reduction in execution time through proactive performance profiling.
- Participated in code reviews, authored technical documentation, and collaborated cross-functionally on internal software modules — consistently demonstrating a seeker mindset in identifying improvement areas.

KEY PROJECTS

Cinema Seat Reservation System — Python, Django REST Framework, React.js, TypeScript, PostgreSQL

- Architected RESTful backend endpoints with Django REST Framework to handle real-time booking transactions, seat-tier pricing logic, and data persistence in a PostgreSQL relational database.
- Built a dynamic, component-driven frontend using React.js and TypeScript with cross-device compatibility, real-time seat selection state management, and responsive UI rendering.
- Designed PostgreSQL schema with normalized tables for users, bookings, and pricing tiers, optimizing query performance for concurrent seat reservation transactions.

Digital Attendance Tracker — *Python, Django, React.js, TypeScript, PostgreSQL, MySQL, HTML, CSS*

- Developed a full-stack web portal using Django backend and React.js frontend with TypeScript, enabling role-based access control for administrators and employees.
- Implemented secure authentication, responsive form components, and a PostgreSQL/MySQL database schema that reduced manual attendance errors and streamlined HR operations.

Task Management Application — *React.js, JavaScript, CSS, REST API*

- Developed a responsive task management application with reusable React components.
- Implemented dynamic task creation, filtering, and status tracking features.
- Integrated REST APIs for real-time task updates and asynchronous data handling.
- Improved application usability through responsive design and optimized rendering.

E-Commerce Frontend Web Application — *React.js, TypeScript, HTML5, CSS3*

- Built modern UI pages including product listing, cart, and checkout workflows.
- Implemented component-based architecture for scalable frontend development.
- Used API integration and async/await for product data fetching.
- Ensured cross-browser compatibility and mobile responsiveness.

Automated Software Testing Framework — *Python, Selenium, PyTest*

- Engineered a cross-browser automated UI testing framework validating login workflows, user interactions, and form functionality across Chrome, Firefox, and Edge.
- Generated structured HTML test reports with automated screenshot capture on failure, reducing average debugging time significantly and enabling faster CI/CD feedback loops.

AI-Powered Personal Assistant (JARVIS) — *Python, SpeechRecognition, NLP*

- Built a voice-activated assistant using Python NLP libraries to parse and execute system commands, implementing robust error-handling that improved command recognition accuracy by 20%.

ACHIEVEMENTS

- Built and deployed multiple frontend and full-stack projects using React and Python technologies.
- Strong understanding of frontend fundamentals including component lifecycle, state management, and API handling.
- Continuously learning advanced frontend engineering concepts and modern development practices.

ADDITIONAL INFORMATION

- Available for immediate joining.
- Strong willingness to learn and grow in a fast-paced environment.
- Comfortable working in fast-paced and collaborative environments.
- Strong problem-solving ability, attention to detail and communication skills.
- Open to remote and hybrid opportunities.

EDUCATION

B.Tech in Computer Science | Radhakrishna Institute of Technology and Engineering, Bhubaneswar
Score : 74.37% | **CGPA: 7.94 / 10** **2017 – 2021**
+2 in Science | Stewart Science College, Cuttack | **Score : 52%** **2014 – 2017**
Matriculation | S.S.V.M TULASIPUR, Cuttack | **Score : 57%** **– 2014**

CERTIFICATIONS & TRAINING

- Data Analysis Using Python – IBM
- Python (Basic) – HackerRank | ID: 0e618ad01c64
- SQL (Basic) – HackerRank | ID: f2d8e83dae15
- Software Training – Central Tool Room and Training Centre (CTTC), Bhubaneswar

LANGUAGES

English (Professional Proficiency) | **Hindi** (Fluent) | **Odia** (Native)
